

For main courses, soup, pastas, coffee and wines, our water gives everything the most amazing taste.

Highlights

Smaller water clusters

- Brings out more ingredients and tastes.
- Gets more nutrients into cells.
- Provides cleaner food washing and preparing.

Stable alkaline, pH corrected (8.0~8.5)

- Makes dishes, coffee, cocktail and beverage taste better.
- Removes acidic elements that are the cause of many chronically diseases.

Ionized,

- Antioxidant for keeping food fresh.

Healthy minerals

- Retains healthy minerals in tap water and increases calcium, magnesium and zinc.

Cleaner and costs less than bottled water

- Removes bacteria, particles of 0.1 micron (μm) and larger, chlorine, total trihalomethanes, lead, heavy metals, odour, rust, parasites, pesticides, dirt, cysts, nitrate nitrogen, nitrite nitrogen and many other contaminants.

Designed in Canada

Specifications

Filtration methods:

0.1 micron ultrafiltration; KDF/ calcium sulfite and activated carbon filtration; ionized microcluster alkaline water generator.

Cartridge dimension:

Stainless steel cartridge dimension: length 67 cm, diameter 9 cm

Water output:

300 litres/hour, 1.3 gallons/minute

Source water:

Metropolitan tap water

Filter change:

12 months or 14,600 litres / 38,56 gallons (depends upon tap water quality and flow rate)

No plug-in or power required.

No synthetics or chemicals added.

No synthetics or chemicals Added.
