

6. Cleaner Water: Removes harmful contaminations from tap water

Our tap water is dirty and full of pollutants. See the filters for yourself:

New PP cotton filter cartridge

PP cotton filter cartridge after being used for 3 months

To the left, is a new PP cotton cartridge. To the right, is the same PP cotton cartridge taken from Water80 ionized microcluster alkaline water filter system after being used for just 3 months. Note the rust, dirt, cloudiness and other contaminations we caught. Would you want your family members to drink tap water like this?

Underground pipes of city tap water are usually over 100 years old and never replaced. With a foul taste and deleterious effects on the body, tap water contains:

- ❖ **chlorine:** a cause of rectal cancer, colon cancer and bladder cancer
- ❖ **rust:** a cause of liver cancer
- ❖ **chloramine:** a toxic chemical compound
- ❖ **lead:** a poisonous metal that can damage nervous connections and cause blood and brain disorders
- ❖ **bacteria and other contaminants**

Boiling water can kill bacteria but it cannot remove chlorine, lead, rust and other pollutants. It is also a common knowledge that fish die from living in unfiltered tap water or boiled water within a few days due to chlorine and other contaminants. When people reach middle age, accumulation of the various pollutants from tap water in the body can help to cause many chronic diseases. Several researches with funding from Health Canada, including one conducted in 1998 in Ontario, have linked chlorine and its by-products (e.g. trihalomethanes) to increased risk of rectal cancer, colon cancer, and bladder cancer. For women: This chlorine content in our tap water is one of the reasons why more women in the last 5 years have breast cancer than they did 25 years ago.

Besides the cotton filtration, we also use active carbon filtration, KDF filtration, 0.1 micron ultrafiltration and ionized microcluster alkaline water filtration (patent pending) to remove chlorine,

lead, volatile organic chemicals, total trihalomethanes, chloramines, parasites, cysts, alga and other contaminations that can not be seen by the naked eye. The ALS Laboratory is approved by B.C. Health Office for drinking water testing. The test conducted by ALS Laboratory shows that Water80 ionized microcluster alkaline water is cleaner than bottled water such as DASANI from Coco-Cola.

Usage of Water80 Ionized Microcluster Alkaline Water

For the best results, form a habit of drinking a glass of ionized microcluster alkaline water first thing in the morning on an empty stomach, before breakfast. Besides daily drinking, use our water for baking breads, cooking, taking medicine, making beverages, mixing cocktails, making ice, washing food and brushing teeth.

Ionized Microcluster Alkaline Water Purification System

Detoxifies body
Enhances beauty
Fights diseases
Extends life

Our customers enjoy the benefits of Water80 ionized microcluster alkaline water, especially the people with these conditions:

- ❖ over weight problem
- ❖ dry skin and acne
- ❖ high sugar level in blood and diabetes
- ❖ constipation
- ❖ high blood pressure and cholesterol.
- ❖ digestive distress and acid stomach
- ❖ migraines
- ❖ blood circulation problem
- ❖ urea stones
- ❖ insomnia and sleeping problem
- ❖ arthritis and joint pains

Water is often considered as the best medicine. When you caught a cold, the most common advice from your doctor is “drink more water”. It’s a fact that 70% of human body is water. Water80 ionized microcluster alkaline water helps your body heal itself and fight five major causes of diseases:

1. **An acidic body environment**
2. **Dehydration**
3. **Wastes and toxins inside body**
4. **Free radicals and oxidants**
5. **Pollutants in tap water.**

Through this brochure, you will learn important characteristics of our water and how it helps you achieve reverse:

1. Life vs. Death: Alkaline Water

A pH of 7 is neutral. A pH values less than 7 is acidic while greater than 7 is alkaline. Over-acidification of the body is the single underlying cause of all disease. In 1931, Dr. Otto Heinrich Warburg was awarded the Nobel Prize in medicine for discovering that primary cause of cancer is the lack of oxygen in a cell. Acidity in the body creates a lack of oxygen. The following microscope pictures show the proven results:

Before:

Red blood cells are de-hydrated and clump together. They cannot carry oxygen you need.

2

Normal pH of human arterial blood has a pH of 7.35 ~ 7.45, also a weak alkaline solution. By falling below a pH of 7.35, the blood is acidic, highly likely with disease.

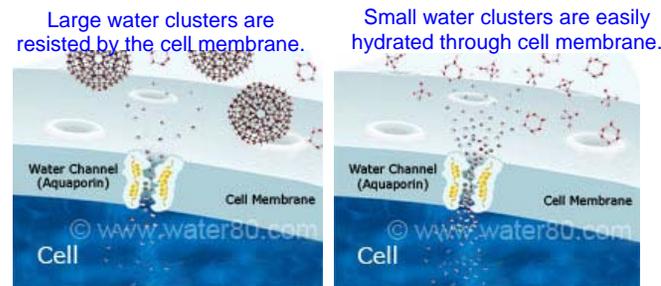

Health Condition, Blood Color and pH

The truth is most of the food in our modern diet is too acidic (e.g. milk pH=6.5, tea pH=5.5, coffee pH=5.0, beer pH=4.5, orange juice pH=3.5, coke pH=2.5, meat, egg, cooking oil, cooked grain and sweets) and produces an imbalance in the form of acidity in the body. Most of the water we drink is also acidic. Tap water in cities (e.g. Vancouver, BC and Seattle, WA) is acidic and has a pH of 6.5 on average. Bottled water, filtered water, mineral water, spring water and other beverages have a pH below 6.5. On the other hand, Water80 ionized microcluster alkaline water is alkaline and has a pH of 8.0~8.5. Drinking alkaline water is effective at controlling over-acidic pH levels in body.

2. Better Hydration, Nutrition Absorption and Detoxification

Water80 system breaks down water hydrogen that bonds together into small water molecule clusters that are easily absorbed into the body's cells. Not only does that make the skin and cells better hydrated, but also more nutrients can get directly into the cells. As another benefit, wastes are more easily eliminated from the cells. You can only take several supplement pills a day, and the detoxification effect is limited in stomach and bowel. However, you can drink a lot of water. Only Water80 ionized microcluster alkaline water can reach everywhere inside body for deep detoxification. As people get older, not only does the skin become drier, but also the body starts to lose water from inside.

"Proper hydration is critical for people with diabetes because water has to be organized around insulin - for every one insulin molecule, you need 440 water molecules." (Source: CSI memorandum - 2004 - Better Hydration Needed for Diabetics).

A human body gets old from a lack of water (literally dries up). Our water helps you look and feel better from both inside and outside.

In just 3 days, the onion root in Water80 ionized microcluster alkaline water grows much larger than the other one in bottled water or tap water. This is because the smaller water clusters have better hydration, bring more nutrients into cells and improve metabolism. This amazing demonstration shows that our water is the water of life and it helps your body fight diseases and heal itself faster.

3. Ionized with Anions

Water80 ionized microcluster alkaline water is ionized and is a powerful antioxidant. This is because our water contains an excess amount of "negative potentials". Our water contains rich anions, negatively charged ions, such as chloride - a chemical the human body needs for metabolism. Chloride also helps keep the body's acid-base balance.

4. Healthy Minerals and Anions

A certain amount of various minerals are essential for daily intake. Water80 ionized microcluster alkaline water filter system retains minerals and increases dissolved anions in water. Comparing to tap water in Vancouver BC, calcium is increased from 1.22 mg/L to 2.6 mg/L, magnesium is increased from 0.15 mg/L to 1.0 mg/L, and zinc is increased from 0.005 mg/L to 0.5 mg/L.

5. Changes 70% of Your Body

It's a fact that 70% of human body is water. On average, a healthy person needs 2 liters of water per day, and it takes approximately one week to renew the water in entire human body. After 70% of the body is changed with healthy water, improvements of chronic diseases have been achieved, even beyond expectations.
